Anti-doping objectives and roles

World Anti-Doping Agency (WADA)

- Established in 1999
- International Olympic Committee initiative
- Funded and governed equally by governments and the Olympic Movement

Objectives

- Harmonise anti-doping rules across sports
- Efficiently identify cheaters to protect clean athletes
- Develop common values in all sports

- **WADA**
 - World Anti-doping Code Compliance monitoring
 - Code Annual list of prohibited substances

- **International Federations**
 - Providing education programs;
 - conducting testing at their competitions and out-of-competition;
 - sanctioning those who commit anti-doping rule violations

- **National Anti-Doping Organisations**
 - Testing national athletes in and out-of-competition, as well as athletes from other countries competing within that nation's borders;
 - Adjudicating anti-doping rules violations;
 - And anti-doping education.

A doping test step by step

FIA or National Anti-Doping Organisation

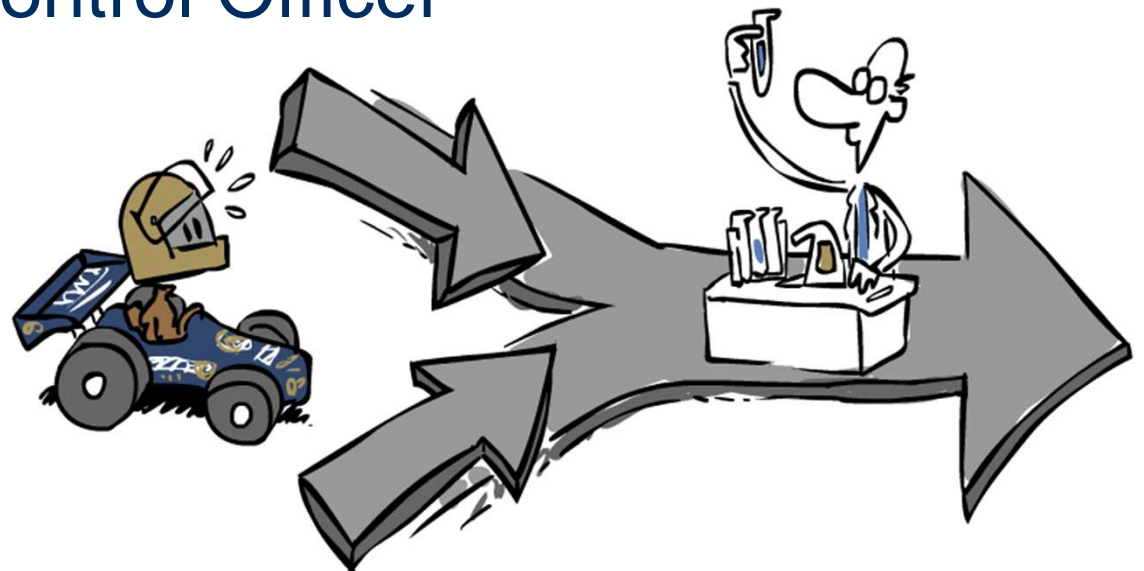

- Testing Authority

National Anti-Doping Organisation or Service Provider

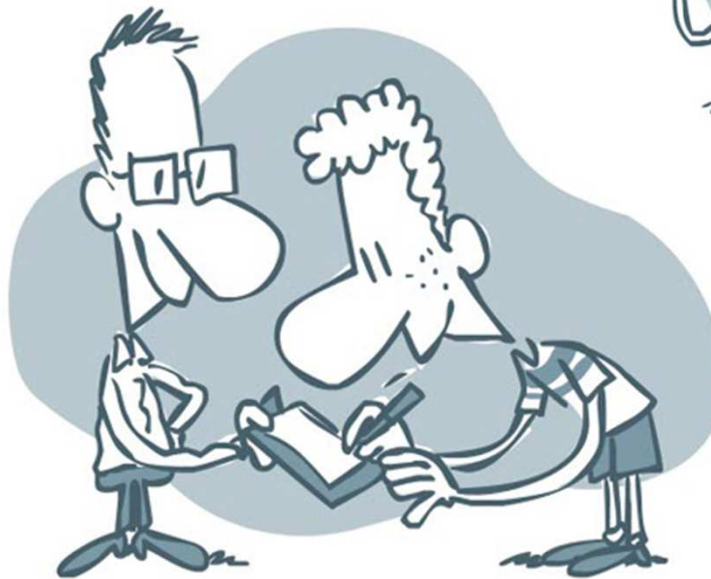

- Sample Collection Authority
- Appoints a Doping Control Officer

WADA Accredited Laboratory

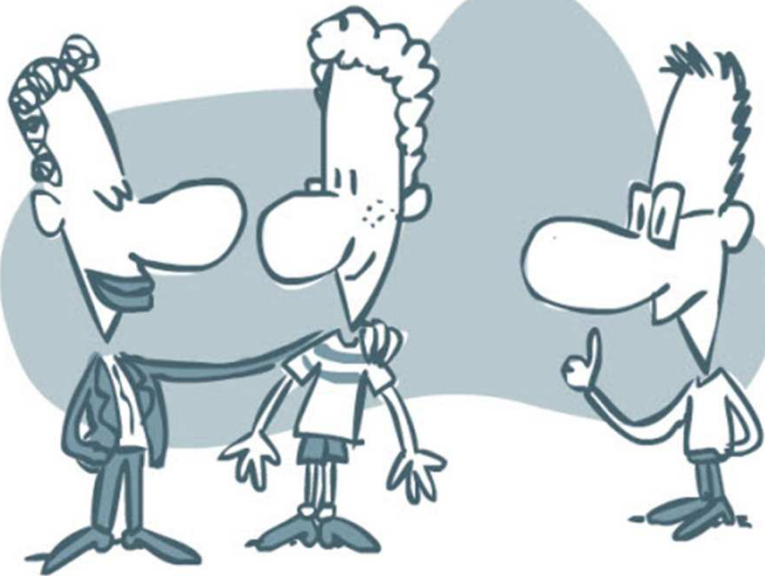

- Sample analysis
- Reporting to FIA

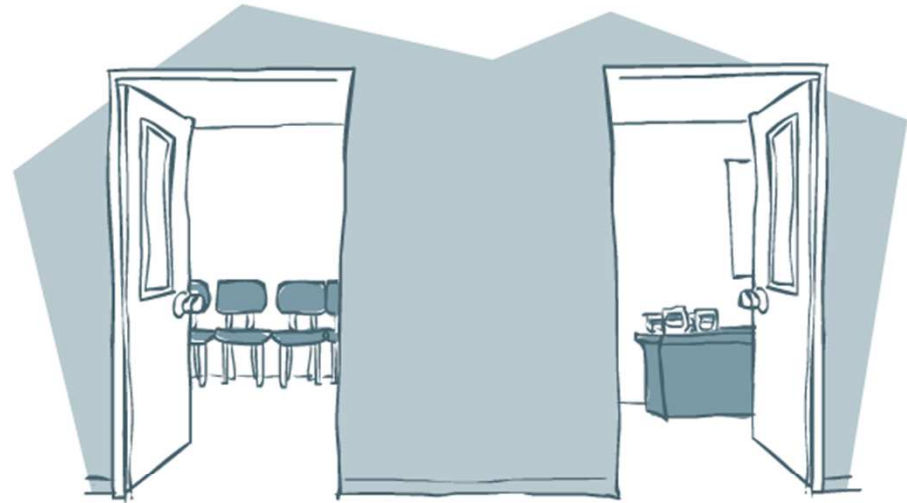

Notification and Observation by Chaperone

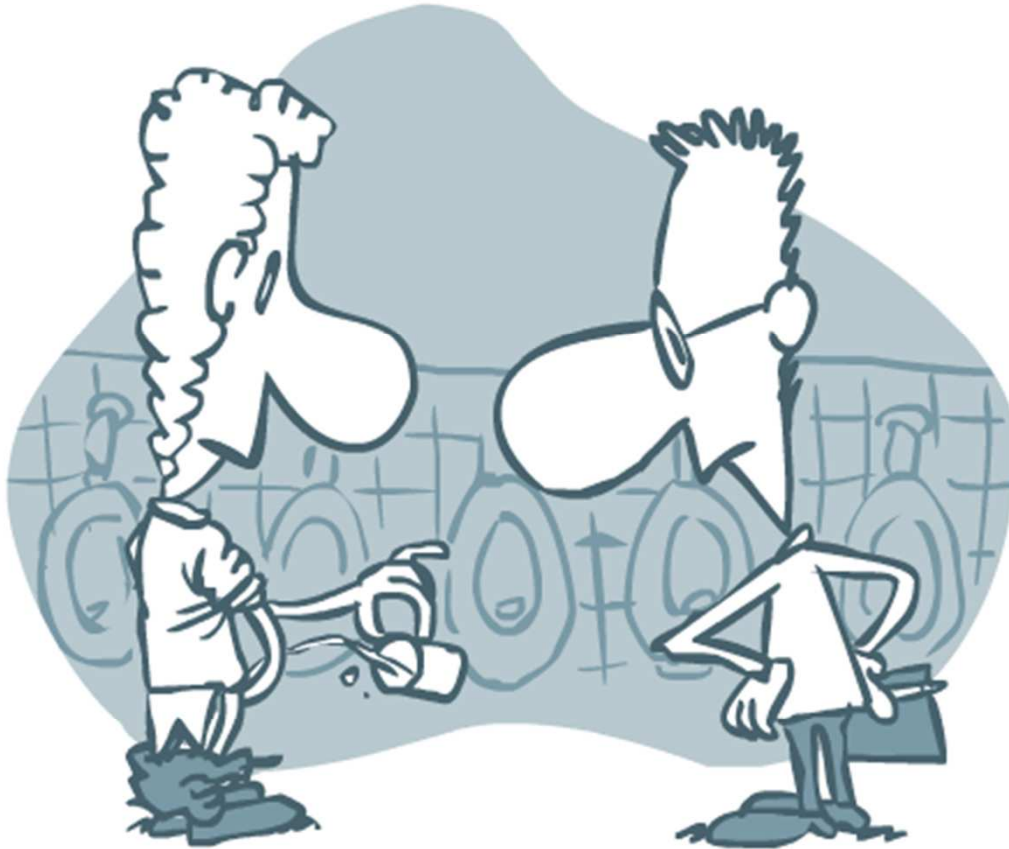

Sign the
Notification Form

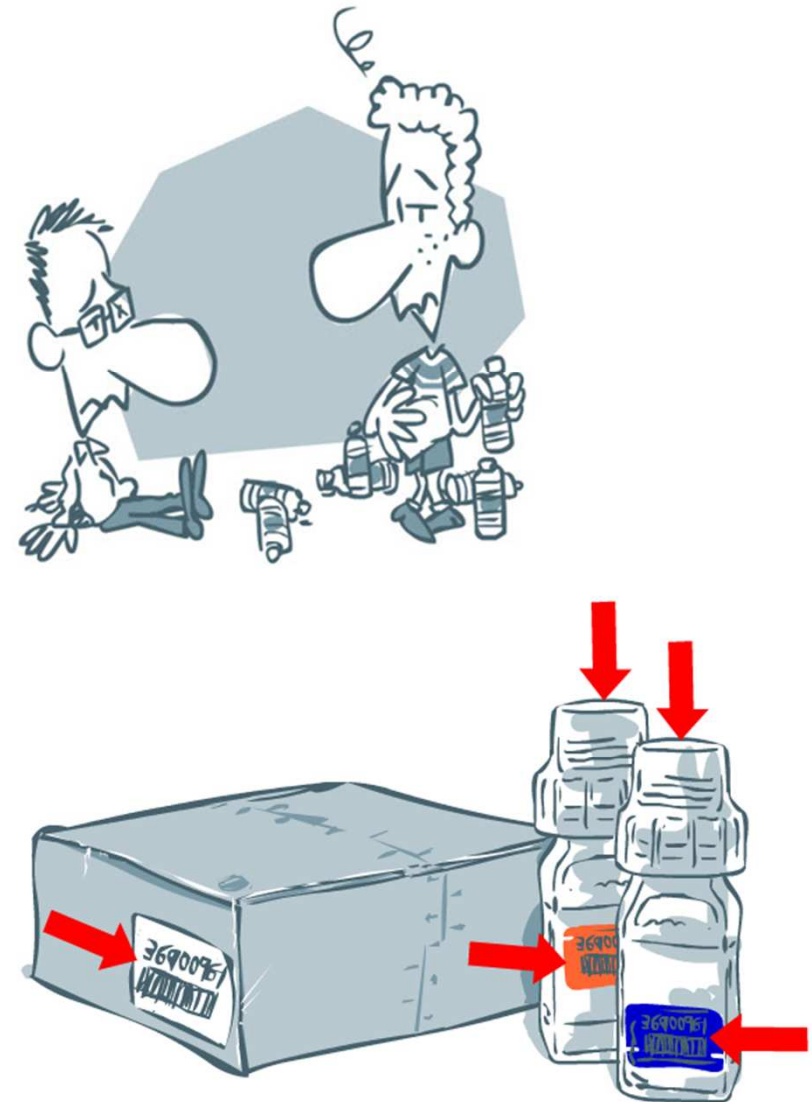

Arrival at the
Doping Control Station

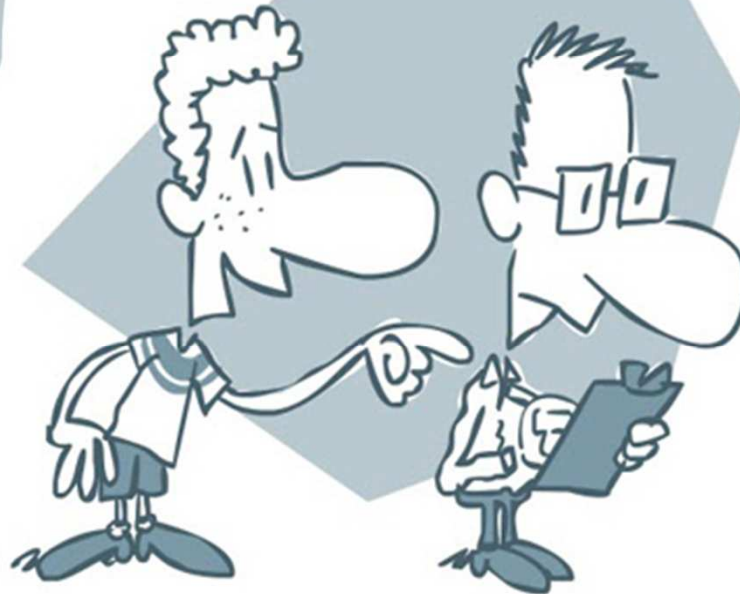

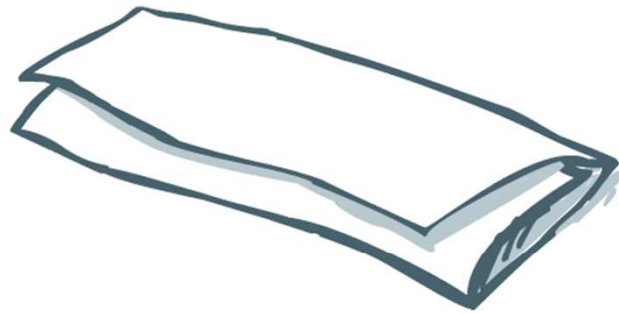

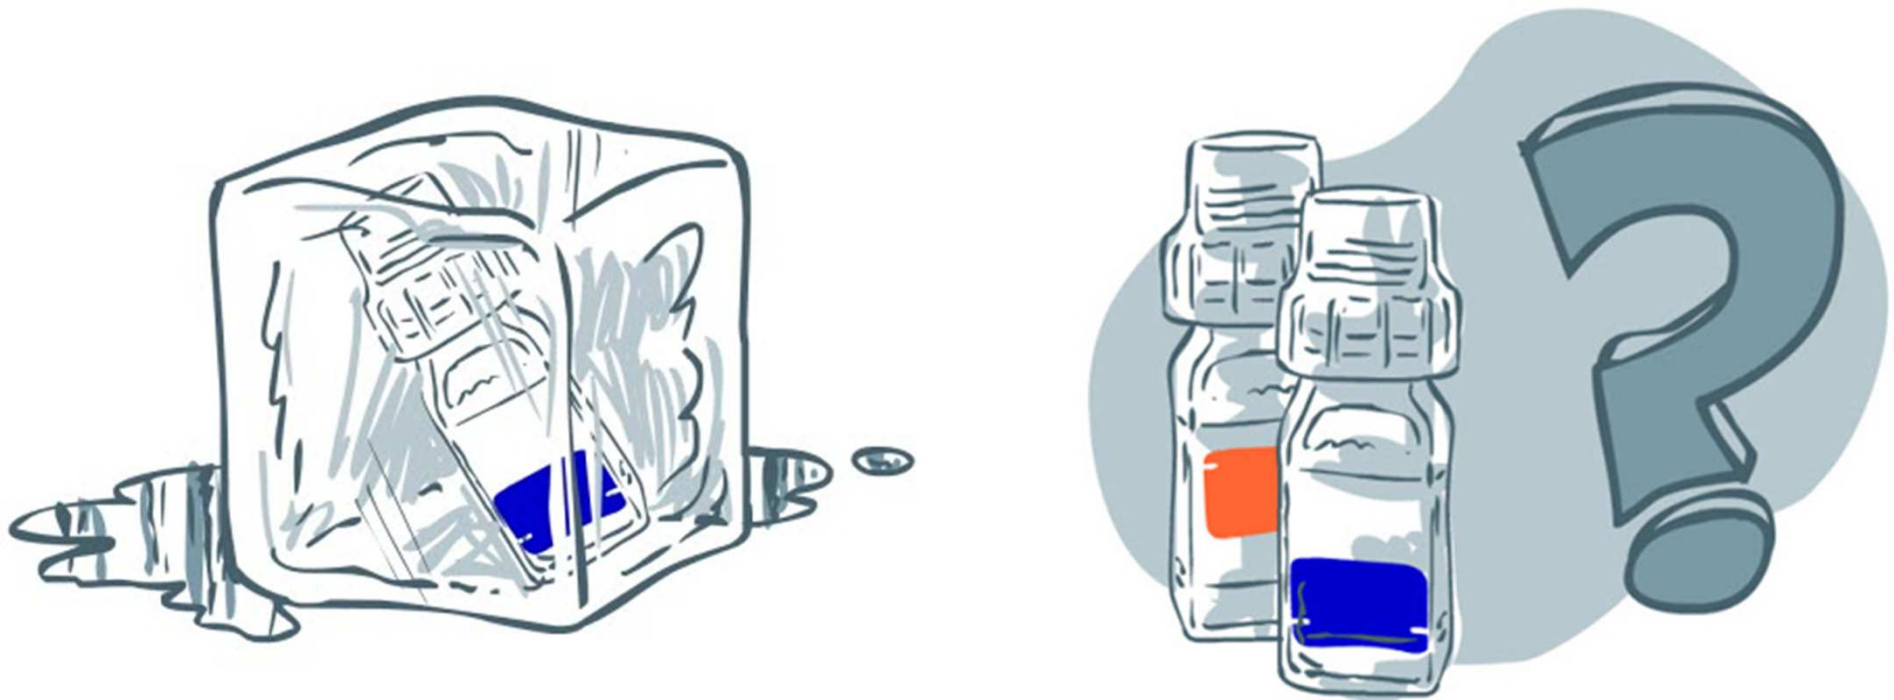

Providing a sample

Doping Control Form

Transport to WADA-accredited laboratory for analysis

Role of the organiser of a competition in the preparation of a doping test

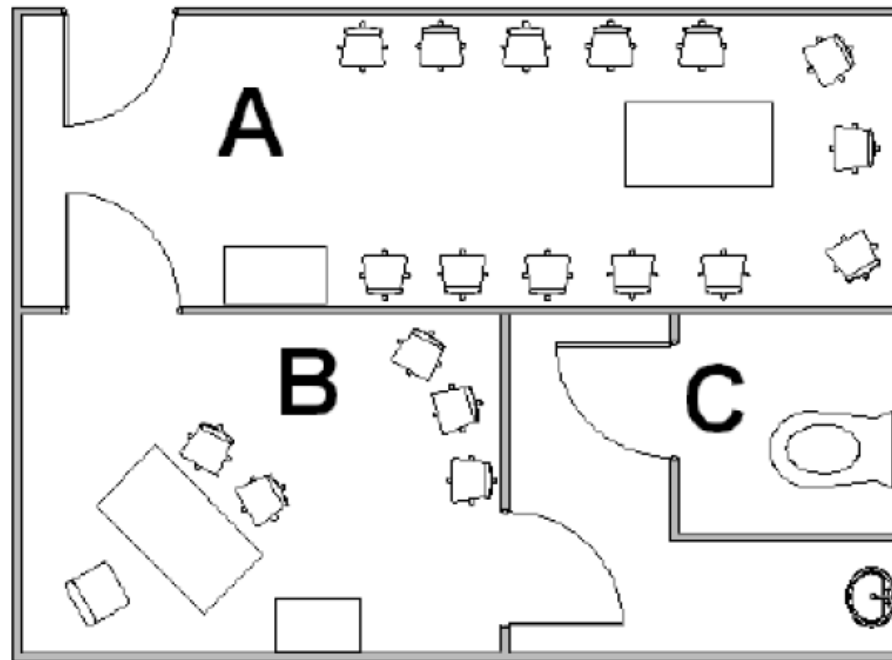

1. Supply a doping control station

- Requirements detailed under Supplement 6 of Appendix H to the International Sporting Code
- The doping control station must contain:
 - At least one room intended for the control
 - Independent toilet facilities
 - A sufficient stock of sealed bottles of water
 - the Chairman of Stewards must check the compliance of the DCS. If not: must be rectified prior to the start of the competition.
- Access to the Doping Control Station must be clearly indicated in English

Example of compliant Doping Control Station:

2. Ensure that accreditations are available

- The Doping Control Officer(s) and the designated Chaperones will require accreditation to access the Stewards, Drivers and Doping Control Station
- No advance notice in case of control
- Please coordinate with the Chairman of the Stewards to make sure accreditations are available from the beginning of the competition

3. Ensure the availability of Chaperones

FIA Chaperones must:

- Be over the age of eighteen (18)
- Be able to communicate effectively in English
- Not have any Conflict of Interest in the role of a Chaperone
- Be available to meet Steward's request to assist with an eventual Doping Control at very short advance notice
- Male and female Chaperones should be appointed, depending on the sex of the Athletes competing.

Organisation of the controls

- Controls can be organized by the FIA or the National Anti-Doping Organisation of the country where the event takes place
 - The FIA has jurisdiction for all competitions registered with the FIA International Calendar
 - The NADO can organise controls for all events taking place on its territory, whether national or international (ex: the Swiss NADO can test during FIA/national competitions organised in Switzerland)
- The control proceedings for a control are the same **for a minor or a disabled driver**, except that they will be allowed to be accompanied by a **representative** throughout the sample collection

- All the materials in connection with the control will be provided by the DCO (or the Chairman of the Stewards), to the exception of the **bottles of water**
- The Doping Control Station/Medical Center might be used for **alcohol testing** (organized solely by the FIA)
- Around 115 drivers have been tested this year over 30 competitions (from World Championship to International Series)
