

PRESS RELEASE - NOTICE

- The entries for the "Hi-Tech Mobility Rally EKO 2019" opened.
- This year's event, for cars that run only on electricity, will take place in Athens during the weekend of 4 and 5 May having its base in "Kotzia" square, towards the City Hall of Athens.
- The itineraries followed by this Regularity event will be of a loop form starting and finishing in the above-mentioned square in which also the recharging of car batteries will be organized.
- The maximum number of entries is limited to 16 vehicles that will be selected on the basis of the widest possible spectrum of electric vehicle models which are available for normal sales in the Greek market today.
- The HEL.I.E.V. for this purpose, invites all importers who offer to the Greek market such type of cars, urging them to enter vehicles in the event giving to the public the opportunity to look them up close by visiting a central point of Athens, as the Kotzia square is.
- The event of this year is once more supported by the traditional sponsor of "EKO S.A." which has been declared as its "Golden Sponsor»
- Charging outlets that will be used are designed and constructed by HEL.I.E.V. But there is still the possibility of cooperation with interested importers – makers of charging systems for electric

cars in order to demonstrate to the public these products in working condition.

- On the website of HEL.I.E.V. (<http://www.heliev.gr>) has posted the Supplementary Regulations with its annexes, indicative maps of the route as well as the Regulations governing the E-Rally Cup of FIA.
- Please note that the deadline for entries submission is Monday afternoon of April 22 when the final list of participants will be published. According to the regulations, for the realization of the event this list should contain at least 8 electric cars
